

## Smart innovative technology for integrated risk-driven & people-centric cybersecurity and compliance management

### Are you navigating a cyber minefield?

Ongoing changes to the regulatory landscape and the emergence of new cyber threats mean organizations must implement even stricter cybersecurity strategies, cyber-risk assessment and monitoring to keep their systems secured and better anticipate new cyber risks.

### Gain 360° visibility on your cybersecurity posture

The EGERIE Platform, available in SaaS or On-premises, enables CISOs and Risk Managers of organizations of all sizes to gain visibility into their compliance and cybersecurity posture, spread a cyber performance culture throughout their company, for increasingly controlled risks, higher cyber protection and confidence.

Whether you are conducting risk analyses, integrating cybersecurity into projects, measuring the cybersecurity level of your IT/OT systems or evaluating the cybersecurity level of your third-parties, EGERIE Risk Manager allows you to build a powerful mapping of your IT assets, business assets and risks, linked to threats, vulnerabilities, as well as set proper ownership and responsibility, plan risk mitigation controls and monitor your cyber and compliance posture on a continuous basis.

# EGERIE Risk Manager

## Key features

### Industrialization of the risk analysis process

- Multi-framework and multi-method compliance
- Comprehensive libraries of pre-defined templates, industry standard frameworks, methods and sets of vulnerabilities, threats and controls.
- Risk analysis "Guided" or "Expert" modes

### Advanced Collaboration

- Key stakeholder engagement through configurable risk prequalification and control status questionnaires
- Asset Owner identification
- Dashboard and risk analysis sharing
- Organization management

### Acceleration of decision-making process

- Automatic Risk reduction and control proposal
- Risk remediation investment budget and prioritization

### Cybersecurity Program Management

- 360° View on cyber risk posture across all risk analyses (Risks, Controls, Treatment Plans)
- Monitoring Cockpits (Global/Local, qualitative/quantitative, based on user role)
- Simulation tool to get an accurate snapshot of how new risks, threats and controls can impact the cyber posture

## Substantial benefits, at all levels

### CISOs and Risk Managers

**We help you gain visibility into your compliance and cybersecurity posture, identify high risks and threats qualitatively and quantitatively, plan remediation action and measure the efficiency of your cybersecurity program.**

- Ensure compliance against key standards in the cybersecurity and data privacy domains
- Gain operational efficiency by saving time and reducing effort
- Engage key stakeholders in the risk analysis process
- Streamline investment prioritization
- Communicate a precise picture of the state of your cybersecurity and compliance program performance to your Executive Committee

### Executive Committees

**We help members of Executive Committees understand how their cybersecurity and compliance posture could impact their business performance in financial terms and accelerate decision-making.**

- Get clear cyber-risk visibility and understanding
- Accelerate decision-making based on true cyber posture expressed in financial terms
- Improve your cybersecurity ROI
